

MA SCHOOL BUILDING AUTHORITY GREEN REPAIRS

Various Locations, Massachusetts

Client

Massachusetts School Building Authority

Description

The Massachusetts School Building Authority (MSBA) officially launched its \$300 million Green Repair Program in March 2010 to expedite the energy efficient repair or replacement of roofs, windows and boilers in public K-12 municipal school buildings.

Preapproved designers for these MSBA funded repairs were required to follow the Massachusetts Stretch Energy Code, which is a set of enhanced building system energy-efficiency requirements. Implementing improvements under this code should result in approximately 20% greater building energy efficiency.

Tighe & Bond performed a range of roof, window, and mechanical system/boiler improvements and upgrades for the following communities and schools:

- Greenfield, MA: Four Corners Elementary School
- Palmer, MA: Converse Middle School, Palmer High School and Old Mill Pond Elementary School
- Westfield, MA: Highland Elementary School, Paper Mill Elementary School, Southampton Road Elementary School, Vocational Technical High School and Westfield High School.
