

PRESS RELEASE

NEW WEBSITE EMPHASIZES ACCESSIBLE, COMPREHENSIVE INFORMATION AND SOCIAL MEDIA UPDATES

Westfield, Massachusetts –January 12, 2012 –Tighe & Bond recently launched a [new website](#) aimed at making information on the engineering firm’s core services easier to find and more comprehensive. Although the firm had made ongoing revisions to its prior website, this completely revamped website is right in step with the firm’s 100 years of service.

“Part of being a progressive engineering firm that is client focused means keeping up with technology and making it easier for our clients – and others – to readily find the information they seek on our website,” says David Pinsky, President of Tighe & Bond. “We also wanted to bring elements of our core business into greater focus and create a fresh design,” he adds.

Beyond the firm’s traditional core business – civil engineering, water, wastewater and environmental consulting - the new website highlights the firm’s newer areas of expertise. This includes renewable energy, as well as the latest 3D modeling and GIS technologies.

Tighe & Bond’s new website offers dynamic and interactive features such as the ability to ask a question on each website page, review current projects that are out to bid and request a host of technical papers authored by Tighe & Bond staff. The new website also features a revitalized section on career opportunities and information on the company’s culture. It also integrates Facebook, Twitter, and Linked In functionality to keep its followers up to date on the firm’s latest news.

In addition, the website spotlights the firm’s commitment to sustainability, documents the firm’s history, and provides a link to the online commemorative book, *Engineering a Century of Progress: The Evolution of Tighe & Bond*.

Tighe & Bond

Founded in 1911 and celebrating a century in business last year, Tighe & Bond is one of the most experienced engineering firms in New England, with offices in Westfield, Worcester and
