

Our **creativity** makes it possible.

In a field known for black-and-white thinking,
Tighe & Bond focuses on bright ideas, green strategies, and clear solutions.

Our **experience** makes it practical.

Working with public and private organizations across the Northeast,
our engineering and environmental consulting projects demand
creative, collaborative responses to complex questions.

Tighe&Bond

Being a leader in engineering and environmental consulting services can mean different things to different people.

To our clients, it means having a go-to project leader and team you trust. To us, it means being innovators and problem solvers. Together, we have achieved many great things.

Although Tighe & Bond has been around for more than a century, we have never stopped evolving and improving to keep pace with the growing needs of our clients. Vision, technical expertise, exceptional service and strong client relationships have always been at the forefront of who we are. *Moving forward is what we do.*

Our Services

Building Services

Our services include integrated environmental and geotechnical engineering, structural engineering, fire protection, and mechanical, electrical, and plumbing (MEP) design.

Coastal & Waterfront Engineering

We specialize in the assessment, design and construction of structures built along shorelines, waterways, ports and harbors including piers and wharves, industrial waterfronts, marinas, intakes and outfalls, seawalls and revetments, and more.

Environmental Consulting

Our services include site assessments and remediation, demolition and hazardous materials, environmental permitting and planning, wetlands and ecological services, regulatory compliance, health and safety, and solid waste facilities design.

GIS & Asset Management

Having a good asset management plan in place can maximize performance efficiency and reduce overall costs of facilities and infrastructure asset lifecycles. Geographic information system (GIS) services can play a heroic role.

Site Planning & Design

Our large, skilled, and multidisciplinary staff helps clients navigate the often complex site approval process, from concept through schematic design, design development, construction documents, bidding, and construction oversight.

Transportation Engineering

We provide traffic engineering, roadway design, and transportation planning services to state department of transportations (DOTs) as well as regional, municipal, private, and institutional clients throughout the Northeast.

Water & Wastewater Engineering

Water resources is where we got our engineering start, and we have been committed to keeping up with and pushing forward the ongoing evolution in this practice area ever since. We specialize in drinking water, wastewater, stormwater, and dams.
